RESOLUTION ON THE ANNUAL REPORT OF THE HEALTH OFFICER OF THE PORT OF CALCUTTA FOR THE YEAR 1899.

No. 744 Marine.

Government of Gengal.

MARINE DEPARTMENT.

MARINE.

Dated Calcutta, the 7th April 1900.

#### RESOLUTION.

READ-

Letter No. 3583, dated the 9th March 1900, from the Inspector-General of Civil Hospitals, submitting with his remarks the report of the Health Officer of the Port of Calcutta for the year 1899.

Establishment.—Dr. W. Forsyth held charge of the office of the Health Officer throughout the year. Surgeon-Captain Clemesha, i.m.s., Dr. C. Banks, and Dr. J. L. Hendley were appointed Assistant Health Officers of the port to assist in the inspection of crews and passengers of vessels leaving the port or arriving from plague-infected ports. Mrs. MacIntosh was appointed on the 28th May 1899 to inspect female passengers leaving the port.

Inspection of vessels .- The total number of inward and outward bound vessels inspected during the year was 2,217 against 2,168 in 1898 and 2,091 in 1897. The total number of vessels which arrived in the port was 1,231, of which 975 were inspected. There were 1,235 departures; but the number inspected was 1,242. This difference is accounted for by the fact that the arrivals registered in the Port Office do not take into account vessels of under 100 tons, while all such vessels are inspected under the Plague Regulations.

3. Sickness and mortality among European seamen.—The number of European seamen who arrived in the port was 19,647 against 20,401 in the previous year. The daily average in port was 1,200 against 1,232 in 1898. The total admissions into hospital amounted to 1,110 with 44 deaths, which gives a death rate per mille of 39.64 against 15.42 in the previous year; the quinquennial mean being 21.02. During the year the death rate has been higher than in the previous 14 years, the increase being under all heads. Including the deaths out of hospital, the death rate per mille was 50.00 against 22.72; 33.27; and 40.92 in the three preceding years. Of the admissions into hospital, nine were due to cholera, all of which were fatal. There were 65 admissions from bowel complaints, three of which were fatal. Under fevers there were 198 admissions with seven deaths. Small pox accounted for eight admissions with two deaths; sunstroke six admissions, with five deaths; and scurvy four admissions. There were eight cases of drowning during the year.

4. The following table shows the number of admissions into hospital from

venereal diseases during the year 1899 and previous 10 years:-

|      |     |     |     | Admission. | Admission-rate<br>per 1,000. |
|------|-----|-----|-----|------------|------------------------------|
| 1889 | ••• |     | ••• | 186        | 114.3                        |

|      |     |     |     |            |                              |

5. Sickness and mortality among the native floating population.—The total number of deaths reported during the year was 125, of which 24 died in, and 101 out of, hospital. The figures for the previous year were 22 and 100. The death rate, 4.87 per mille, is higher than that of 1898, viz., 4.76. Of these deaths, 36 were from cholera; five from bowel complaints; 37 from fever; and 47 from other causes.

6. Pilgrim traffic .- No pilgrim ship sailed from Calcutta during the year

under review, as this port is not a port of departure under the Act.

7. The S.S. Jeddah with pilgrims from Jeddah arrived at Diamond Harbour on the 15th May 1899, but owing to a misunderstanding the pilot of the vessel allowed the pilgrims to be landed before they were inspected by the Health

Officer. Suitable notice was taken at the time of the pilot's action in the matter.

8. The S.S. Naderi with 517 pilgrims arrived at Diamond Harbour on the 2nd July 1899. Three hundred and ten pilgrims were landed after disinfection of their clothing by steam, and were despatched by rail under police escort to their destination. Two hundred and four Javanese pilgrims were kept on a flat moored in midstream, and transferred to a steamer bound for Singapore; their clothing was disinfected by steam; soiled and worn clothing, worn matting, and sacking, &c., were destroyed, the articles being replaced by new clothing, &c.

9. During the voyage of the Naderi there were three deaths—one from

dysentery; one from fever and convulsions; and one from heart disease.

10. The S.S. Mozaffari arrived at Diamond Harbour on the 7th August 1899, with 572 pilgrims all well. Similar precautions were also adopted in the case of this vessel. During the voyage there were nine deaths from bronchitis, diarrhœa, dysentery, heart disease, paralysis, phthisis and general debility.

11. Plague.—As stated in paragraph 7 of this Department's Resolution No. 656Marine, dated the 5th April 1899, rules for quarantine against plague

and for the medical inspection, isolation, observation, and surveillance of persons suffering from that disease were sanctioned by this Government in August 1897. Under these rules the arrival of all vessels from plague-infected ports had to be telegraphed to the Health Officer, and all vessels anchored at Diamond Harbour, if there were a case of plague on board, and at Matiabruj, if there were no such case.

12. Three hundred and nine vessels arrived during the year from the plague infected ports of Bombay, Karachi, Honkong, Penang, Mauritius, and

the Hedjaz. No case of plague was found on any of these vessels.

13. Corpses and carcasses found floating on the river.—The number of corpses found floating on the river shows a small increase, the figure being 117 against 94 in the previous year. The number of carcasses was 1,686 against 2,204 in 1898—a substantial decrease.

14. Water supply.—Municipal filtered water was supplied to the shipping throughout the year, and no complaints regarding the quality or quantity supplied were made.

15. Food complaints. - Four maunds of dried fish intended for the native

crew of the S.S. Clan Ferguson were condemned as unfit for food.

Four casks of flour and four casks of biscuits on board the ship Somali were examined at the request of the master and condemned; and a portion of the fish supplied by the contractor for the native crew of the S.S. Acara was also condemned.

16. Conservancy of cargo boats.—The duty of conducting the prosecutions against the manjees in the Police Court for keeping their boats in a filthy state was carried on by the River Police. One hundred and eighty two licensed cargo boats were found dirty, but it is stated that owing to the constant shifting of these boats, and to the giving of false names by the manjee or owner to the Inspector at the time of his inspection, the police were unable to trace out many of the boats, and thus many manjees escape prosecution and punishment.

17. This failure the Lieutenant-Governor is altogether unable to understand. All of these boats are numbered and registered, and there must be means of tracing them. But further the owner and his agent are plainly liable for any breach of the rules, and, if it is the case, as the Inspector-General of Civil Hospitals states, that there is no abatement of nuisances and filth in connection with cargo boats, notwithstanding prosecutions and convictions, then it is the duty of the Health Officer to press the Commissioners to prosecute,

not the manjees, but the owners of the boats.

18. Disinfection,—Twenty sea-going vessels and 23 country boats were disinfected during the year. Seven cases of human hair brought from Hong-

kong were disinfected by being steeped in corrosive sublimate solution.

19. Conservancy.—Five khalassis living in a shed on the south side of the outer dock died of cholera in March 1899. The shed in question was built by Messrs. Turner, Morrison and Company as a salt godown. On examination the Health Officer found the floor to be of various levels and the room badly ventilated, and he suggested that the floor be levelled, that ventilators be fixed in the corrugated zinc roof, and that circular built-up openings at either end be re-opened and protected by shades; that drinking water taps be fixed close to the quarters; and that a urinal be erected close by. These improvements were carried out.

20. The Health Officer reports that there are seven latrines for the use of the native public on the Calcutta side of the river, viz., four above the bridge, and three below it. Of the four latrines above the bridge, that at Juggernath Ghât is most frequented, but as it has only four seats it is hardly sufficient to meet the demands of the people, who are chiefly tenants of the Port Commissioners' lands. It is therefore suggested that either this latrine be enlarged and provided with more seats or that a separate latrine be provided

on the tenanted land for their use.

21. The Health Officer also brings to notice that the Macfarlane's patent latrine recently erected at Koilah Ghât has three compartments. The compartment for native males has only five seats and five urinals, and these are not sufficient for the use of the large number of passengers who pass the night

in the shed thrice a week, previous to their departure by the mail steamers for Burma and Rangoon; and as a result the passengers frequent the foreshore space beneath the landing stages. To remedy this, Dr. Forsyth suggests the erection of an additional latrine.

22. The Health Officer's suggestions on both these matters will be referred to the Port Commissioners, with a request that the proposals may be taken into their early consideration, and a report submitted to Government as to the steps taken.

23. The latrines in the Commissioners' dock at Kidderpore have now all been provided with water tanks for washing, and the nuisances noted under this head in the previous year have been greatly lessened.

By order of the Lieutenant-Governor of Bengal,

The state of the second of the

D. B. HORN,

Offg. Secy. to the Govt. of Bengal.

### RABI CROPS IN BENGAL, 1899-1900.

THE following is published for general information.

REVENUE DEPT., The 9th April 1900.

F. A. SLACK, Offg. Secy. to the Govt. of Bengal.

## DEPARTMENT OF LAND RECORDS AND AGRI-CULTURE, BENGAL.

Note on the outturn of the Rabi Crops in Bengal for 1899-1900.

Explanatory. - The present report furnishes estimates of the area and outturn of all kinds of rabi crops (both food and non-food), including wheat, sugarcane and oilseed crops, for which separate notes are issued, and such special crops as tobacco and opium, for which no separate reports

are published.

2. Character of the season.—The rainfall in September was general in North and East Bengal, practically normal in in Bihar, slightly below the normal in South-West Bengal, and much in defect in Orissa and Chota Nagpur. In October the rainfall was deficient everywhere, except in Orissa and East Bengal, where it was excessive. No rain fell in November in these provinces, except in the Darjeeling hills and in the Chittagong Division. In December also there was little or no rain. The fall in January was below the average everywhere, except in Bihar and Chota Nagpur, where it was greatly in excess, hailstorms doing considerable damage in many places in Bihar. In February there was general rain in Lower Bengal, but only a small fall in Orissa, Bihar and Chota Nagpur. In March the rainfall has been general and fairly well distributed. The season has not been, on the whole, favourable to the rabi crops, and it has proved disastrous to them in parts of Chota

Nagpur. 3. Area sown.—The normal area has been revised by some District Officers, in consequence of which the Provincial total now stands at 14,513,400 acres against 14,895,400

shown in last year's report.

The area cultivated in all kinds of rabi crops this year is, as estimated by the District Officers, 13,840,000 acres as against 14,390,300 acres sown in 1898-99; the area under rabi food-crops standing at 10,036,000 acres against 10,278,000 acres cultivated last year; and that under *rabi* non-food crops at 3,804,000 acres as compared with 4,112,300 acres. Want of rain in the early part of the season accounts for the decrease in all cases.

4. Outlurn.—Out of 45 districts, 4 districts only, viz., the 24-Parganas, Darjeeling, Saran, and Bhagalpur, expect a harvest above the normal, while a normal crop is looked for in two districts, viz., Backergunge and Manbhum. In all the remaining 39 districts the outlurn will fall below the normal.

Of these latter, 13\* Mymensingh. \* Burdwan. districts estimate an Champaran. Midnapore. outturn varying Khulna Darbhanga. Purnea. Rajshahi. between 90 and 100 Dinajpur. Malda. per cent., in 8† Cuttack. Rangpur. Balasore. districts the estimate varies between 80 +Hooghly. Patna. and 90, and in the Nadia. Pabna. Gaya. Monghyr. remaining 18 dis-Sonthal Parganas. Tippera. tricts it falls below

80. Bad crops are reported from Angul, Singhbhum and Palamau, while the rabi crops in Ranchi have been almost a total failure. According to the returns of the District Officers, the outturn of rabi food-crops in these provinces should be estimated at 88 per cent. of the normal as against an estimate of 100 per cent. last year, and that of non-food-crops at 85 per cent. against 91 last year. The estimate for food-crops and non-food-crops taken together amounts to 87 per cent. against 97 per cent. estimated by the local officers in 1898-99. As it seems probable that the effects of the heavy rain and hail in Bihar have in some cases been exaggerated, and that in a few other cases also the outturn has been under-estimated, it may be anticipated that the outturn of the rabi crops of these provinces will amount to about 90 per cent. of a normal crop.

D. L. Roy,

Assistant Director of the Dept. of Land Records and Agriculture, Bengal.

(COUNTERSIGNED.)

P. C. LYON,

|  | The normal area has been revised, The decrease in area this year is due to deficiency of rainfall during the sowing season.                                     |  | The decrease in area under cultivation of what, and the short outthin of the different crops under report, as compared with those of the preceding year are due to the want of seasonable rainfall in November and Decreamble, and partly also to the foul weather which lasted for some days in February. |

| Deficiency of rain during the ploughing and sowning season accounts for the decrease of area and outturn of all the rabi | crops, excepting sugarcane. |                  | The low outturn of tobacco is due to excessive rain at the time of growth and want of  | rain subsequently. The shot outturn of "other graps non-food-crops", is due to want of rain in January.                               |                       |             | The good outturn is due to season-<br>able rainfall. |   |           |                  |  |                      |             |

| 10  | Remarks by District Officers.  | The normal area under wheat has been revised since the submission of the first wheat forecast. The hands were most at the time of sowing, hence the outtrum is expect ed to be fairly good. | The decrease in the area under food crops is due to the heavy floods in the Gaibandha subdivision in consequence of which a large area could not be cultivated.                            |

| V. | Remarks by District Officers.   | The dry weather up to the end of January was count-rivalsanced by good rains, in February, and the ravic crops may be taken now as, normal, per sore. The con- | ditions of the season favoured the sowing of bove rice, and there is therefore an increase in the area under that crop. There is also an expansion of the area under inseed in the Bhota studingion owing to increase d demand by traders from outside the district. |                                  | The outturn would have been greater if the crops had not been damaged in some plates by rain accompanied by hail.                      |

| 10 | Remarks by District Officers.  | The rabi crops have suffered a little from untimely rainfall and hailstorms. Some danned has shormal weaher in Jaunary last, and the flow of juice is reported to be scanty on account of the dry west wind,  | The hallstorm and rains in the last week of January damaged the rabi crop, partenlarly the poppy. The sugarcane crop will be a late ene on the whole. |
| 11 | Remarks by Director,<br>Department of Land<br>Records and Agri-<br>culture, Bengal.  |   | •   |

|  |            |  |             |             | It is probable that the outturn in this district has been underestimated.   |  |  |           |                                      |   |   |                      |             |

| 10 | Remarks by District Officers.   | The normal area has been revised. Excessive rainfall has damaged the rabi crops generally.  The decrease in the area under wheat is due to insufficient wheat is due to insufficient area under gram is chiefly due to grown area under gram is chiefly due to krown on some lands previously cultivated with sugarcane.   |

Singhbhum.—No crop on the ground. Mango crop poor. Mahua excellent. Rice sells at 12 seers in Chaibassa. Average price per rupee 14 seers 2 chitaks.

General Summary.—There was rain during the week in Bhagalpur and in some of the districts of all the Divisions except Patna, and has been of begefit for ploughing operations, which are being pushed on. The barvesting of rabi crops is nearly completed, and the absence of rain in the Patna Division has been beneficial to the threshing. The sowing of bhadol crops and jute is still going on in North and East Bengal. Mahua is for the most part a good crop, but the reports about the mango crop are generally bad. Fodder is generally sufficient, but water is reported to be failing in Angul and the Chuadanga subdivision of Nadia. The price of rice has fallen slightly in 10 districts and risen in 6 On the whole it is stationary with a slight downward tendency, most marked in the Chota Nagpur Division. Cattle-disease is reported from some districts. Test-works are open in Angul, Puri, Hazaríbagh, Ranchi, and Palamau, but the numbers attending are small.

By order of the Lieutenant-Governor of Bengal,

F. A. SLACK.

Offg. Secretary to the Govt. of Bengal.

The number of hours with winds from each of the 8 points— N. 35, N.E. 18, E. 11, S.E. 23, S. 255, S.W. 241, W. 36, N.W. 19, Calm 106.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore '003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1.0 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KUCHLER,

METEOROLOGICAL OFFICE, GOVT. OF INDIA, Alipere (Calcutto), the 6th April 1900.

The average fall of the corresponding period for 24 years, Surveyor-General's The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86,

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The average relative humidity of the corresponding period for 24

The average fall of the corresponding period for 24 years, Surveyor-General's

The directions and the movement of the wind are taken from the trace of a Beekley's anemograph. The mouth of the rain-gauge is one foot above the ground.

1, stormy wind; o, overcast, g, gloomy; p, passing temporary showers; t, thunder; <, lightning; >, dew.
